DIGI-NET REPORT:

Monday 18 June 2018

For tonight's net we had VK2PMG/SRC as net control with John VK2JWA, Leith VK2EA, Steve VK2SLM and Duncan VK2DLR. After the customary round of greeting and chat we QSY'd to 2 metres USB, 145.1 MHz.

Tonight we used the analogue image transmission program MMSSTV again using PD180 and 240 which allows for larger image sizes. Since there was only Duncan and I, we had time to exchange a large number of images. Bird photos seemed to dominate. Results were excellent even though signal strengths were S4 at best.

A very nice net finished at 9.45pm. Thanks to all those who logged in and participated.

Cheers from Paul VK2PMG

This was from Bom Bom Enduro

CLUB SHACK REVAMP – Web SDR and Parrot Repeater unavailable

The re-organisation of the club shack is underway. The room has been almost completely stripped out, ready for a new arrangement which will involve having separate areas for HF and V/UHF, with new benches, wall lining and re-arrangement of 12V and 240V power.

Rob V2ARL is making the new benches. We are looking at getting modern radios installed, possibly SDR transceivers with spectrum displays.

Pic below – the stripped out shack.
