SSTV

VK2DLR spent the weekend at the 50th Keppel Bay Shell Show. The 40 metre band was chosen after using the "Droidprop" smartphone application. A few photo's later and VK2DLR was pumping out SSTV images on 7.033 MHz. Netbook pc, Signalink and the FT-100D combined to put 50Watts of MMSSTV Scottie2 images into a quarter wave antenna. The antenna was a 'DLR special' using about 10m of wire from the HF antenna mount on the bullbar to a 7m squid pole on the Landcruiser's roof rack. Check out the photos below on how the images were received at SRC.

DIGITAL MODES:

Monday 3 July, 2017

For tonight's net we had VK2PMG/SRC as net control and VK2JWA and EA logged in to say hello. Stations transmitting digital modes were VK2PMG/SRC, DLR, and ACD. We started off on the Woodburn repeater, 147.250 FM. After the successful work done on the last few nets with FI Message, I decided that we should reward ourselves with a session transmitting images on Easypal.

The images of shells transmitted by PMG/SRC were sent due to the upcoming visit to the shell exhibit in Queensland by DLR. The cat cartoon was aimed at him also!! All three operators sent images, some needed a BSR (Bad Sector Report). Following the transmission of any bad sectors, the images were perfect. The path profile image was made for the Spring Mountain WICEN exercise. As Chris ACD pointed out, the vertical exaggeration in the plot is considerable and the radio path worked in practice. The net closed at 9.20pm and thanks to those who participated.

Cheers from VK2PMG

Sarc Meeting (postponed):

Today's meeting did not meet the numbers to run it today, So, it will have to be run next Sunday 16th, as per the Sarc Constitution...
