New content for Sarc Newsletter required

If you believe you have something interesting to share with other like minded NL readers, let us know & we will leave some room in this weekly newsletter for your story or links.

Although we mainly publish Amateur Radio content, some of our regular readers & members are also into Radio Astronomy & other space related interests too. (*sorry, NO Flat Earth stories required*) hihi :)

Friday Night Net Controller Wanted

Who wants to have a crack at running the Friday night net?

No experience necessary. Just turn up at 8:00 pm on a Friday night, take up the club call sign and call for participants. Run it your way. Pick a theme, run a quiz or whatever you want. You're just there to control the flow. Not available every Friday night? No worries. Just arrange for someone else to stand in when you're absent.

Turn up on the Friday night net and give it a go.

New edition of QTC Magazine

RASA has published a new edition of their E-Magazine QTC. It's free and contains 70 pages of good reading. A wide variety of topics are covered and you'll find something of interest whether you're a beginner or an old hand. Click on the link on page 3 and watch the video on SSTV. It's 56 minutes long and gives a nice insight into some of the history and technical issues behind the transmission of images and moving images over Amateur Radio. Plenty of good reading for all.

DIGITAL Report:

TUESDAY 8 SEPTEMBER, 2020

Tonight we had *Brian VK2FMAN, John VK2JWA, Duncan VK2DLR, Dave VK2ZDR and Leith VK2EA* join *Paul VK2PMG* for the net. After last week's somewhat interrupted net, it was back to normal. There was the usual two rounds of personal chat before Duncan and I QSY'd to our normal frequency of 144.230 USB. We used MMSSTV again, the Yoniq (Spanish) update. It seems to be working fine with no major problems and it has picked up seamlessly from the original Makoto Mori version, last updated in 2010. It must seem at times that we travel over old ground on the Digi Net week to week, but it is difficult to avoid that. Any software or mode that we use must be reliable enough for communications to work. Thanks to Duncan for his support and to anyone who logged in.

Cheers from Paul VK2PMG
