- Paul VK2AMT

TUESDAY NOVEMBER 16, 2021

This week we had Chris VK2ACD, Duncan VK2DLR, Dave VK2ZDR and Brian VK2MBJ logging in. We were going to try MMSSTV on HF, starting from 40 metres and trying 80 metres also. After our couple of rounds of chat Duncan and Dave QSY'd to 40 metres where we would join up with Jeff VK2WSR.

I wasn't able to hear anyone on voice and wasn't able to decode any images on 7.049 USB either using Scottie 1 and decided to transmit a number of images while Dave and Jeff tried out 80 metres. The lack of decode on 40 metres suggested a problem at my end so I went to 80 metres also so as not to waste time. Dave and Jeff also had Zoom running which was quite handy. My images on 40 metres had been received by Jeff very well, much better than Duncan and Dave received them. Very odd. The group then sent a number of images around on 80 metres but all were rough and jagged. The best image on 80 metres was sent by Jeff, a photo of the survey marker at Cameron's Corner, in spite of the snow on the image and he also received and decoded the best images.

A somewhat challenging night, the local propagation really produced some pretty rough results while

the most distant station, Jeff VK2WSR, received the clearest. Having Zoom was handy under those conditions. Thanks to all who braved the conditions.
