COMMITTEE MEETING

Sunday 8th May, @ 1300hrs

HARRY ANGEL CONTEST

Sunday 8th May

Tuesday-Net Report

DIGITAL MODES

- Paul VK2AMT

TUESDAY 12 APRIL, 2022

We used SSTV so there is a collection of pics this month.

This evening, logging in with Paul VK2AMT as VK2SRC were John VK2ZJJ, Duncan VK2DLR and Jeff VK2WSR from Dubbo. As usual, we had out two rounds of chat before Duncan and I QSY'd to our 40 metre frequency of 7.046 USB.

We started on Fldigi, Olivia 8-500 for a few overs and then switched over to MMSSTV, a program we hadn't used for a while. Neither of us had lots of images prepared but we had a good time overlaying short messages onto the images. Due to the closeness, the images were received well.

After that, we switched back to Fldigi at 9.25pm for a few more overs. A good net, even if it was only the two of us. Thanks to all those who logged in and particular thanks to Duncan for his support, it helps to keep this net going.

– Cheers from Paul VK2AMT (as VK2SRC)

Image Communications on Short Waves by Martin OK2MNM - de Duncan VK2DLR

If you go to [http://www.sstv-handbook.com/](https://www.sstv-handbook.com/) you'll find a link to download a pdf book titled "Image Communications on Short Waves" by Martin Bruchanov OK2MNM.

The book is free and the 175 pages occupy a bit under 2Mb. Written in 2019 it details how SSTV image are created by the many old and new formats.

The most of the chapters deal with analogue SSTV with Digital SSTV and WEAFAX (Radio Facsimile) getting chapters also. Well worth reading or just another reference for your electronic bookcase.
