## Tuesday-Net Report

## DIGITAL MODES

- Paul VK2AMT

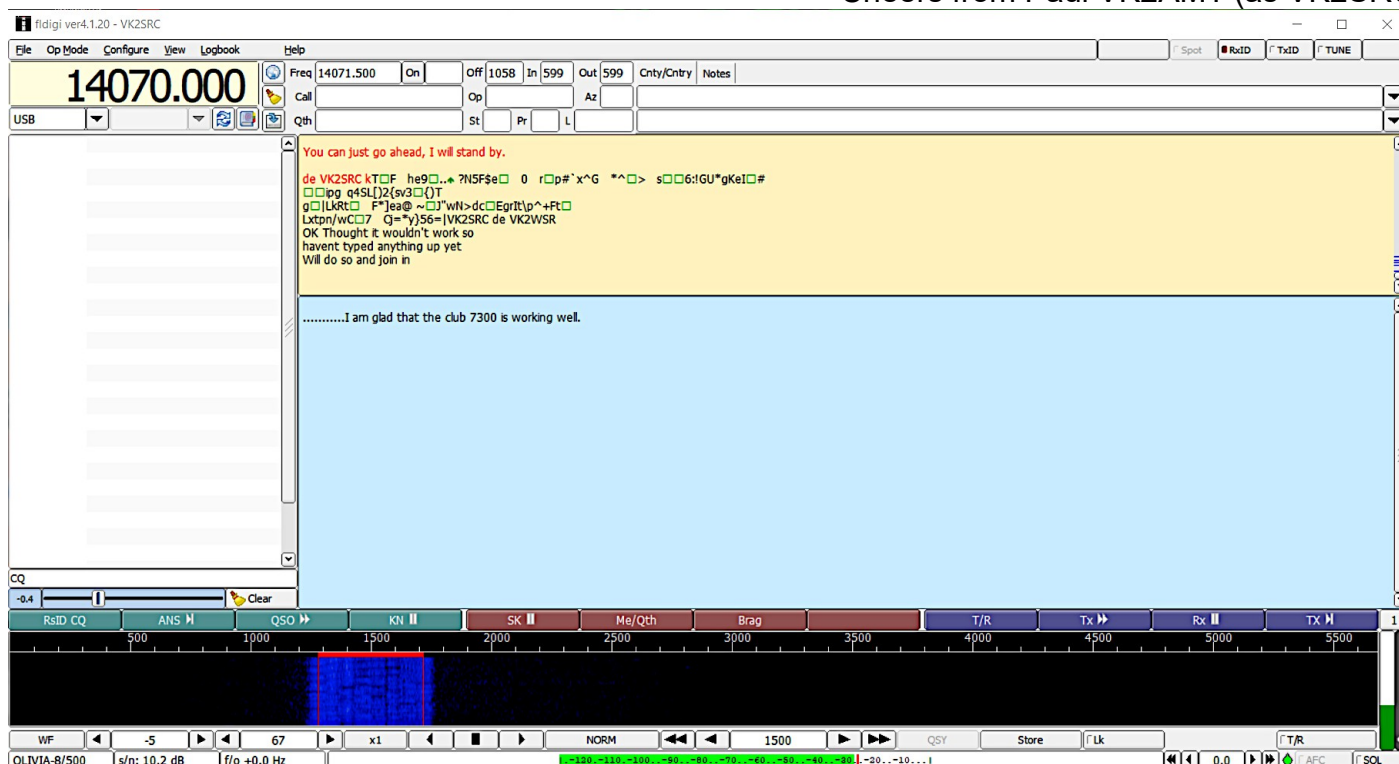

TUESDAY 24 MAY, 2022

Once again Tuesday night rolls around. Joining Paul VK2AMT as VK2SRC were: John VK2ZJJ, Duncan VK2DLR, Dave VK2ZDR, Jeff VK2WSR and Chris VK2ACD. As usual, we had our two customary rounds of personal news before Duncan joined me on 40 metres again, 7.046 USB.

We used Fldigi and Olivia 8-500 again. I cannot think of a better keyboard mode than Olivia. The band was quite good, noise wise, and we were both able to decode each other easily. Jeff joined us after a few overs, using the Club's Icom 7300, from his location on South Australia's York Peninsula.

This required a fair bit of dexterity, running the RemoteHams software RCForb Client to control the 7300 remotely and also Fldigi to trigger transmit. Well done Jeff, that is quite an achievement and an excellent result after all the work and effort required to enable remote use of the 7300. This is particularly the case when you remember that Jeff was using Fldigi, not just speaking into a microphone. An excellent net and a great result. Duncan expressed a desire to experiment with WEFax mode in Fldigi at some time. That sounds like a good idea, possibly for 2 metres SSB, for a clean path. Thanks Duncan and Jeff for making it all possible.

– Cheers from Paul VK2AMT (as VK2SRC)
