Tuesday-Net Report

DIGITAL MODES

- Paul VK2AMT

TUESDAY 21 JUNE, 2022

For this evening's net, joining Paul VK2AMT as VK2SRC were John VK2ZJJ, Duncan VK2DLR, Jeff VK2WSR and Dave VK2ZDR logging in. As it happened, all bar John VK2ZJJ were ready to proceed with digital and we all QSY'd to 80 metres.

We used Fldigi and Olivia 8-500 on our normal frequency of 3.590 USB. There were some light static crashes heard from offshore weather down south. The noise at my location was S4. Most of us used about 40 watts, Dave used 20 watts. All the signals received were around S9 or comfortably above. A good aspect of our frequency is the relative absence of interfering signals, unlike 40 metres which is quite busy in the digital modes area.

The decoding accuracy was 100% and we all enjoyed the benefits of 80 metres' local propagation benefits without the noise from weather systems that may well intrude later in the year. An excellent net with good discussion. Thanks to all who participated.

- Cheers from Paul VK2AMT (as VK2SRC)

A quick summary and a few photos of VK2SRC's portable activation of Vista Point for the Winter VHF UHF Field Day on 6m, 2m, 70cm, 23cm, 13cm & 9cm.

Local activity was down compared to usual but we still managed a reasonable number of contacts with some good distances achieved. Final results yet to be confirmed as the log has to be compiled & cross checked but things look good.

Local contacts were made with several SRC members VK2AMT, VK2ACD, VK2XML & VK2AKK, also with Grafton Group members VK2BTS/P, VK2VL, VK2ZB/P and VK2ZVG, contacts & many VK4 stations. Great to see a few local portable stations, well done Tony & Mark.

6m - 314km VK4CZ
 2m - 393km VK4S
 70cm - 300km VK4OE/P
 23cm - 377km VK4UH/P
 13cm - Nil contacts but could hear the beacon over 300km away
 9cm - 305km VK4AFL

Thanks to all that made contact with VK2SRC portable during the event. A special thanks to Graham VK2BWC for his assistance & supply of morning tea yummys.

The Weather was fine but a little chilly with overnight lows of -4c with a wind chill of -10c, if you look closely in the second photo you can see the frost on the ground.

John Moyle Memorial Field Day Certificate

- Graeme VK2QJ

The VK2SRC/P JMMFD certificate has arrived.
