

SARC RADIO NET NUMBERS/CHECK INS

Weekly HF Dawn Patrol – 40 - For week ending Thur 04AUG2022.

Monday – 5

Tuesday – 6, with Jeff VK2WSR waiting on the QST frequency.

Wednesday – 3

Thursday-Tribander

- **8** – 2 metres Woodburn; with a new operator John VK2IGI. Windy conditions produced crackles on everyone's signal. Strong signals into the repeater reduced the crackles but they were still there if you listened.

- **5** – 6m Parrots Nest; with faint background crackles.

- **7** – 70cm Parrots Nest. Clean signals, no crackles and excellent performance from that beaut 70cm repeater.

Friday 80m Net – 6

Tuesday-Net Report

DIGITAL MODES

- Paul VK2AMT

TUESDAY 2 AUGUST, 2022

For this week's Digi Net we had Duncan VK2LR, John VK2ZJJ, Jeff VK2WSR, Chris VK2ACD and Dave VK2ZDR joining Paul VK2AMT for the net. We had our normal two rounds of chat before we QSY'd to our normal 80 metre frequency of 3.590 USB.

We used Fldigi and Olivia 8-500 once again, mainly because it works so well. It really is difficult to think of anything better for keyboard to keyboard comms. Duncan, Chris and Jeff were on frequency to join me. The noise was a fairly solid background racket, but we had no problems with decode. Any stormy weather was far off and didn't produce any strong crashes locally. The conversation was excellent as usual. I think that the keyboard modes must help to concentrate the discussion, the

topics of which ranged from amateur radio assessors, the march of technology in our working lifetimes and photography moving from the chemical trays of the darkroom to digital cameras.

An excellent net with a great range of views on a variety of topics, something that is a welcome and valuable feature of the net. Thanks to all for their fine contribution.

– Cheers from Paul VK2AMT (as VK2SRC)
